IP Litigation in the AI Era: Challenges and Strategies

Jordana Sanft will share her expertise at the Intellectual Property Institute of Canada (IPIC)'s AI & IP Law Webinar Series on the panel, *IP Litigation in the AI Era: Challenges and Strategies*. The session will explore the impact of artificial intelligence (AI) across every phase of IP litigation, including best practices for using AI tools in document collection, organization and discovery, the responsible use of AI throughout the litigation process, and the Court's expectations for AI-assisted written materials and interactions with the Court.
